

End-to-End Digital Government Services

Empowering Canadian governments
to adapt, innovate, and
achieve their operational goals

For over 30 years, Vision33 has been implementing industry-leading government technology solutions that meet regulatory and workflow needs while considering employee and citizen experiences.

Our team of local GovTech experts helps you achieve the right balance between adapting to new regulatory requirements and meeting the growing public demand for modern government service delivery.

People	Our team of eGovernment consultants has decades of experience delivering digital government solutions and maintaining professional project management, change management, and business analysis certifications.
Process	We work hand-in-hand with our government clients to ensure their processes are efficient, user-friendly, and optimized to drive productivity.
Approach	We follow a practical, flexible approach while maintaining proper governance and transparent communication, focusing on end-user adoption and readiness. Our proven methodology ensures low-risk implementations.
Deployment	We have experience rapidly deploying enterprise-level eGovernment platforms. We help our clients prioritize critical operations and consider future expansion/enhancements when recommending solutions.

Vision33 sets itself apart from the competition with our **dedicated support, focus on the end user**, and the **quality of the solutions** we implement. We've built strategic partnerships with leading digital government solution providers to ensure our customers get the most effective solutions for their unique needs. Our partners are industry-leading providers of **community development, permitting, planning, licensing, code enforcement, electronic plan review, customer relationship management, and access-to-information solutions**. And with our own integration platform, Vision33 offers clients holistic, end-to-end solutions, enabling seamless, secure experiences for your staff and citizens.

Vision33 delivers the right approach, expertise, and people to empower our government clients to succeed with technology. We have experts in the techniques and software that are most valuable to you, and we optimize your technology investments so you can deliver government services efficiently and improve overall user satisfaction.

Why Vision33?

- 30+ years of implementing government technology solutions
- Significant government knowledge in permitting, planning, licensing, public health, enforcement, and service request management
- A highly skilled team of IT professionals with professional PMI, business analysis, and change management certifications
- Low-risk implementations due to our proven methodology and project governance
- Library of formalized project documentation (e.g., project management, design documents, technical documents, and testing plans) to ensure communication
- Ability to increase internal and public user adoption with a user-centric focus on solution design and configuration

Vision33 keeps things simple by focusing on what matters most to our clients—services grounded in industry best practices. These services span the technology lifecycle, from planning, development, delivery, and change management to full operational support in the form of outsourced managed services.

What does this mean for you? You get the full support of a professional consulting organization that cares about your long-term success.

The Right People, Processes, and Technology

At Vision33, we believe in the promise of technology and are committed to bringing together the best people, understanding the needs of our customers, and delivering value every step of the way.
